

EPOS Advanced Course

Vienna, Austria: 24-25 January 2024

Fundamentals of Pediatric Spine Deformities

Highlights

- Close interaction with faculty
- Interactive case discussions
- Hands-on workshops covering all current techniques to treat pediatric spine deformities:
 - Growth-sparing strategies for early onset deformities
 - Osteotomy techniques in direct contact with experienced spine deformity surgeon

Methods of education

- Lectures
- Interactive workshops
- Discussion

Welcome

Carol C. Hasler

Sebastian Farr

Hakan Ömeroğlu

Dear Colleagues,

This event is aimed at paediatric orthopaedic surgeons, residents and fellows who want to deepen their understanding of the pathoanatomy, pathogenesis, diagnostics and therapeutic strategies of pediatric spine deformities.

This comprehensive, interactive course is led by a renowned faculty of European experts in that field. Particular emphasis is put on hands on workshops with direct teaching of skills, tricks & pitfalls and discussions about different approaches and problem-solving including 3D reduction deformities correction, placing of spine anchors (pedicle screws, sublaminar band, rib fixation, salvage techniques), osteotomies among others.

We hope to be able to provide you with an exciting scientific programme and look forward to your participation.

Yours,

Carol C. Hasler
